# How to connect to NPWirelessX
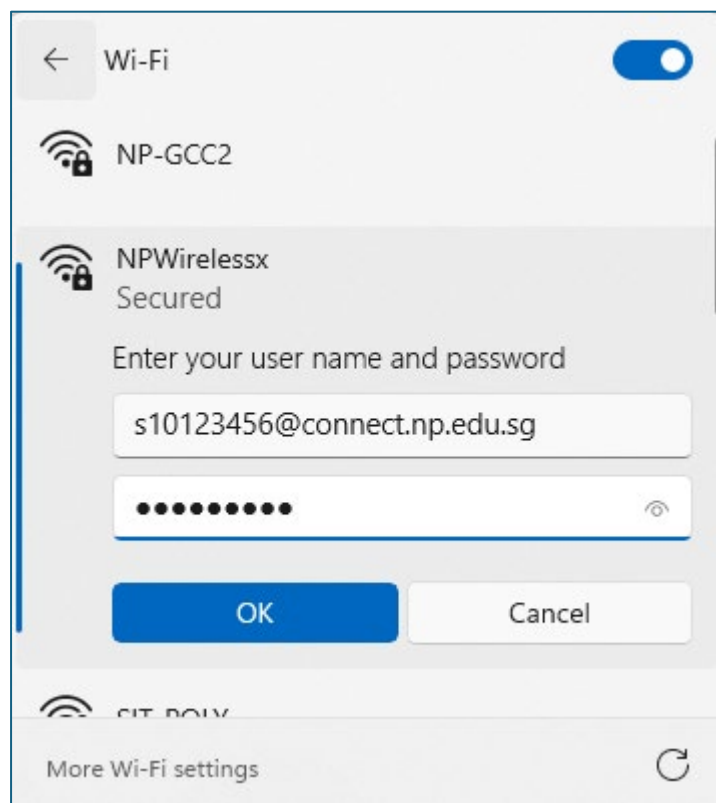

1) Click on the globe icon on the bottom corner of the window and then click on the arrow button beside the Wifi icon.

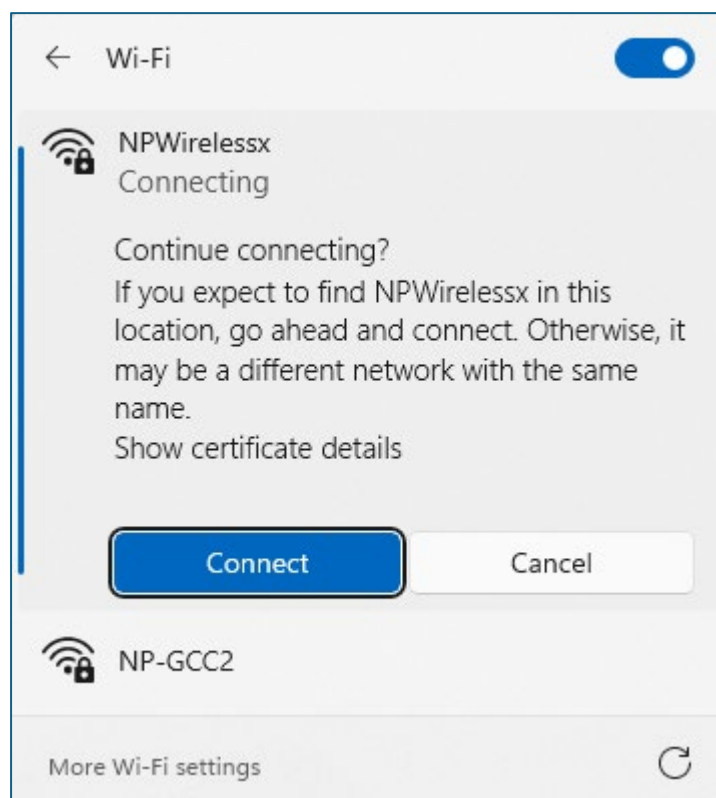

2) Select NPWirelessx from the selection list.

3) Login using your username / password as per below.

4) Click Connect.

If you are still unable to connect to the NPWirelessX, please go to Settings > Network & Internet > Wi-Fi

Enable "Random Hardware Addresses"

If your NPWirelessX has been connected previously, you may need to remove and reconnect again. Select "Manage known networks"

Click on Forget button.
